Brief

Building on previous collaborations, Hurst Joinery Projects were appointed by Maris Interiors LLP to provide bespoke joinery for the transformation of Levels 3 and 4 of The Burlian into modern workspaces.

The client's objective was to create sustainable, flexible workspaces that could adapt to future changes and growth without requiring a complete redesign. Hurst's role was to manufacture the bespoke joinery elements that aligned with these objectives while seamlessly integrating into the overall interior design.

Result

Hurst successfully delivered the joinery elements for the offices on Levels 3 and 4, creating functional and collaborative spaces that met the project's flexible and sustainable design requirements. The high-quality of manufacturing and installation reflected the client's high design standards.

Close collaboration between the project team and the client throughout, ensured the programme ran smoothly, and was completed within the specified timeframe and budget. Following completion of the refurbishment, Maris Interiors was awarded the Ska Gold Certificate for Sustainability, in recognition of the project's commitment to sustainable practices.

Items Produced

- » Upholstered banquette seating to Focus Area
- » Bespoke half-moon teapoints with integrated planters and HIMACS solid surface worktops
- » Painted kitchen units with integrated appliances and HIMACS solid surface worktops
- » Oak-veneered bookcases with built-in tv screen and acoustic panels
- » Doors and front panels to conceal folding walls and doors
- » Oak-veneered Panels
- » Front of house drinks point
- » Coat cupboards, storage units and low level storage
- » ORAC Feature walls containing backlit logo to reception, boardroom, offices and meeting rooms

Challenges

The client's design included two large, bespoke half-moon-shaped teapoints. Their distinctive shape and size posed logistical challenges, both in transporting them to the site and in their installation, requiring meticulous planning and coordination.

The curved framework and solid surface tops of these specialist pieces presented technical complexities, particularly in achieving seamless joints and precise alignment of all components.

Solution

Hurst's scope encompassed the design, manufacturing and installation of various bespoke joinery elements to the reception, board room, offices, meeting rooms and open areas across both levels.

These elements included a custom-built reception desk, painted kitchen units and bespoke half-moon teapoints with integrated planters and solid surface worktops, and ORAC feature walls to accommodate backlit company logos. Upholstered banquette seating, and bookcases with integrated tv screens and acoustic panels were built for install into the open areas, along with coat cupboards and low level storage units. Covering panels for the folding doors ensured these blended into the interior design, when not in use.

“Collaborating with Hurst Joinery Projects on another workplace project has been a pleasure. From first contact with our designers, through manufacture and installation, the team has brought knowledge and expertise to each stage of the project, advising on materials and finishes that meet our sustainability goals, and managing the installation with professionalism and care. The results are excellent, and we are thrilled to have achieved a high quality outcome for our client.”

Luisa Russo

Design Director at Maris Interiors
